

ÉLAN CAFÉ

Web Development Internship – Task 7

Project Report

Project Type: Responsive Café Website

Internship: Synent Technologies – Web Development Internship

Candidate: Varsha Shekar

A modern, responsive café website designed to provide an elegant browsing experience with café information, menu items, gallery content, and table reservation functionality.

1. Introduction

ÉLAN Café is a responsive multi-page website developed as part of Task 7 of the Synent Technologies Web Development Internship. The website presents a premium café experience through a clean visual layout, food and beverage sections, imagery, and an online reservation interface.

2. Objective

- To design and develop a modern café website.
- To create a responsive interface suitable for different screen sizes.
- To present café information, menu items, services, and gallery images clearly.
- To provide an interactive table reservation experience.
- To use HTML, CSS, and JavaScript to implement the website functionality.

3. Technologies Used

Technology	Purpose
HTML5	Structure and content of the web pages
CSS3	Layout, styling, responsive design and visual presentation
JavaScript	Interactive behaviour, forms and website functionality
LocalStorage	Client-side persistence for relevant interactive data

4. Main Features

- Home page with café branding, hero section and featured visual content.
- About page describing the café concept and experience.
- Menu & Services page with categorized food and beverage items, images and prices.
- Gallery page presenting café, food, beverages and bakery imagery.
- Contact page with café information and table reservation form.
- Responsive navigation and page layouts.
- Interactive reservation and ordering-related functionality implemented with JavaScript.

5. Implementation / Methodology

The website was organized into separate HTML pages for the major sections of the café. CSS was used to create the visual design, spacing, typography, cards, buttons, image layouts and responsive behaviour.

JavaScript was used to handle interactive elements and user actions. The website was tested through the browser to verify navigation, page presentation and interactive flows.

6. Project Structure

HTML Pages: index.html, about.html, services.html, gallery.html, contact.html

Styling: CSS files in the css folder and the main style sheet

Scripts: JavaScript files in the js folder and the main script

Documentation: README.md

7. Result

The ÉLAN Café website was successfully developed as a responsive multi-page web application. The completed interface provides café information, visual content, categorized menu items, and a reservation interface while maintaining a consistent visual style across the pages.

8. Conclusion

This project provided practical experience in front-end web development using HTML, CSS and JavaScript. It also helped in understanding responsive layouts, reusable UI patterns, interactive forms, navigation, and organizing a complete website project for deployment through GitHub.

9. Project Submission

The project source code is maintained in a public GitHub repository and the website is deployed using GitHub Pages.
